NESL SOLARTECH OPENS U.S. OFFICE, NESL-USA, Inc., Inc. IN TUALATIN, OR

NESL SolarTech, a solar PV module manufacturer, opens its first U.S. office to deliver high quality, affordable solar energy to North America.

Who We Are

- Solar PV module manufacturing since 2005
- Worldwide customer base (Asia, Europe, Australia, North America)
- 36,000 sq ft Warehouse in Tualatin, OR
- Privately held company with more than 400 employees and 300mw annual capacity

Why Choose NESL-USA, Inc., Inc.?

• **More Power for The Dollar** –We manufacture only positive output tolerance modules at 0% to + 3% so your customers get the most out of their investment.
• **Buy with Confidence** – All modules are UL & CEC Listed, and insured by a 25-Year Output Warranty. • Glare-free finish for higher efficiency in low light settings
• **Ease of Mind** –Our modules are constructed to withstand harsh weather conditions such as UV, severe wind, hail and snow
• **Maximize Earning Potential** – Don't wait months for your order. With module storage and customer support in Oregon, we are ready to deliver when you are.

NEW ENERGY FOR A SUSTAINABLE FUTURE

Since 2005, NESL SolarTech has specialized in research and development, manufacturing, and marketing of solar PV products. In 2010 NESL launched its first North American office, NESL-USA, Inc.. This distribution arm allows NESL SolarTech to offer the highest quality solar PV modules, local delivery and local customer support at a rate that is affordable to individuals and businesses alike.

From our high quality materials and superior product performance to our outstanding customer care, we strive to create the best possible product and experience for our customers. Our strict standards for material selection and application of international standards insure the production of only the highest quality mono and poly solar modules.

We are working every day to meet the world's solar energy needs, reduce our dependence on fossil fuels and minimize our environmental impact. We are increasing production of solar energy solutions that are efficient, clean and affordable, and are researching new energy solutions to complement existing resources.
